# What is the Problem?

Currently, the Labour, Skill Development, and Employment Department functions through multiple standalone portals that lack integration, resulting in poor coordination, delayed decisions, and inefficient service delivery. A centralized digital dashboard is required to unify all roles and streamline communication, task management, and performance tracking under a single umbrella.

# Our Vision

To build a centralized digital platform that connects all employment-related departments and empowers every stakeholder through coordination, real-time data, and smart governance.

# Departments

One Portal. All Roles. Total Coordination

- Job Seekers
- Employers
- Government Officials
- Training Providers

# Departments

## ■ Job Seekers

For the dreamers chasing careers,  
unsure where to begin,  
A dashboard that guides, tracks,  
and brings opportunity in.

## ■ Employers

For those building teams and  
hunting for the best,  
A space to post, filter, and let top  
talent do the rest.

## ■ Government Officials

For the guardians of labour ,  
keeping balance and law,  
A system to verify, track, and see  
what others never saw.

## ■ Training Providers

For the mentors shaping skills  
that fuel tomorrow's flame,  
A hub to manage, certify, and  
uplift every name.

# Job Seeker

A smart, all-in-one platform to explore jobs, upload resumes, track applications, and access skill training—empowering users to take confident steps toward their careers.

# Employee

A centralized workspace for government staff to handle daily tasks and monitor progress. Real-time alerts and a user-friendly interface ensure timely action and improved productivity.

# Government Official

A central dashboard to manage job approvals, monitor welfare schemes, and enforce policies. Real-time data and grievance tools help officials make informed, impactful decisions.

# Training Provider

A single platform to manage courses, track student progress, and issue certifications. Built-in tools support effective, job-ready training delivery at scale.
